

Discover. Detect. Respond.

Introducing a comprehensive, scalable managed security service that pairs best-in-breed security technologies with the invaluable human insight of our security experts to bring you immediate relief and peace of mind at a price your business can afford.

◇ Our Experts Working For You

Focus on your business and leave IT security to us. Our experienced security engineers will help you quickly and easily deploy all the security controls you need to detect and respond to security incidents, protecting your company and your customers against today's threats. Once we are engaged, your security team is extended by our certified professionals and you gain immediate benefit from a team with decades of security experience.

◇ Reduce Your Costs

A flat monthly fee means you can implement best in breed security technologies and experienced staff at a fixed operating cost that is a fraction of what you would pay to turn up the same capabilities yourself. Bring relief to your overtaxed IT Security staff at a fraction of what it would cost to expand headcount.

◇ Improve Risk Management

Our solution provides unprecedented visibility into your network's security state, allowing you to easily and clearly identify security gaps in your IT infrastructure. Quickly and easily expand this visibility across your enterprise and attain more effective and more complete risk management without breaking the bank.

3 Pillars of Managed Security

◇ Fully Customizable

When it comes to security, no size fits all. IDRGroup's Managed Security service is fully customizable and expandable to meet the needs of any business. Quickly and easily add devices, services, or additional locations to your Managed Security solution. Our certified implementation specialists will help craft the right solution for you.

◇ Regulatory Compliance

More and more businesses are subject to regulations that require them to retain critical security information for extended periods of time. Our Managed Security service includes a forensic log store that securely retains your security logs for as long as is needed. Additionally, our event log monitoring and vulnerability scanning helps your business comply with HIPAA and PCI requirements.

Our Approach

Leading edge security technologies powered by AlienVault™ are paired with the human intelligence and insight of IDRGroup's highly skilled security practitioners. This combination allows our Managed Security service to efficiently and effectively address your company's security needs, regardless of size or vertical.

The Right Choice for Your Business

With budgets shrinking and threats expanding on a daily basis, it's more important than ever for companies to get the most out of their existing security investments. Our Managed Security service quickly and painlessly expands your security capabilities for a flat subscription fee, with no capital expenditure and no equipment or applications to maintain. Lower your cost of ownership, focus on your business, and let IDRGroup's team of experts ensure your data and customers are protected.
